Biography

Andre Doumitt

Andre Doumitt is the Director of Innovation Development at The Aerospace Corporation, a federally funded research and development center based in El Segundo, California. Previously he served as President and founder of Digital AdopXion LLC, a consulting company set up to help transition R&D technology in the airborne and space-based data collection and processing domain into new commercial and military programs.

Previously, Mr. Doumitt served as President and CEO of Geosemble Technologies, an In-Q-Tel funded start-up company started as a spin-out of USC's computer science department. Geosemble developed and sold technology to automatically integrate open source text into satellite imagery and maps, and was acquired in 2012. Previous to that role Mr. Doumitt spent five years with BAE Systems in a variety of executive management roles focused on fly-by-wire flight control systems, integrated GPS/Navigation sensor systems and digital map systems. Before that, Doumitt spent two years with the Italian/US Joint Venture Bell Helicopter/Agusta Aerospace, and four years with The Boeing Company developing industrial relationships with international suppliers for Boeing's military and civilian helicopter programs.

Mr. Doumitt has also held several international positions, including a Market Research Consulting position for an Australian research firm in Hong Kong, a Japanese prefectural government position in Tokyo, and at the US Embassy in Paris, where he served with the Consular support staff, the US Department of Commerce and the Coordinating Committee for Multilateral Strategic Trade Control. Mr. Doumitt holds dual BA degrees from the University of California and an MBA from the American Graduate School of International Management (Thunderbird).
