**26,000+ patients in a
clinical setting**

**84% Effective Rate
Discomfort Reduction**

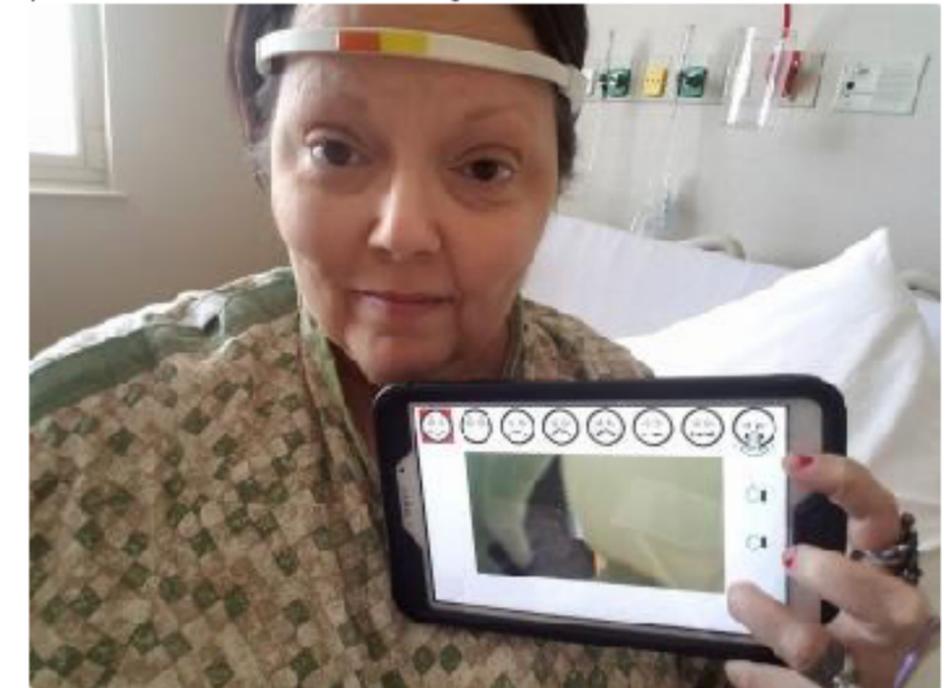

**Realtime Assessment of Patient
Discomfort and Nausea**

Samsung and AT&T Partners

Jaxson_Dallas · 4 months ago

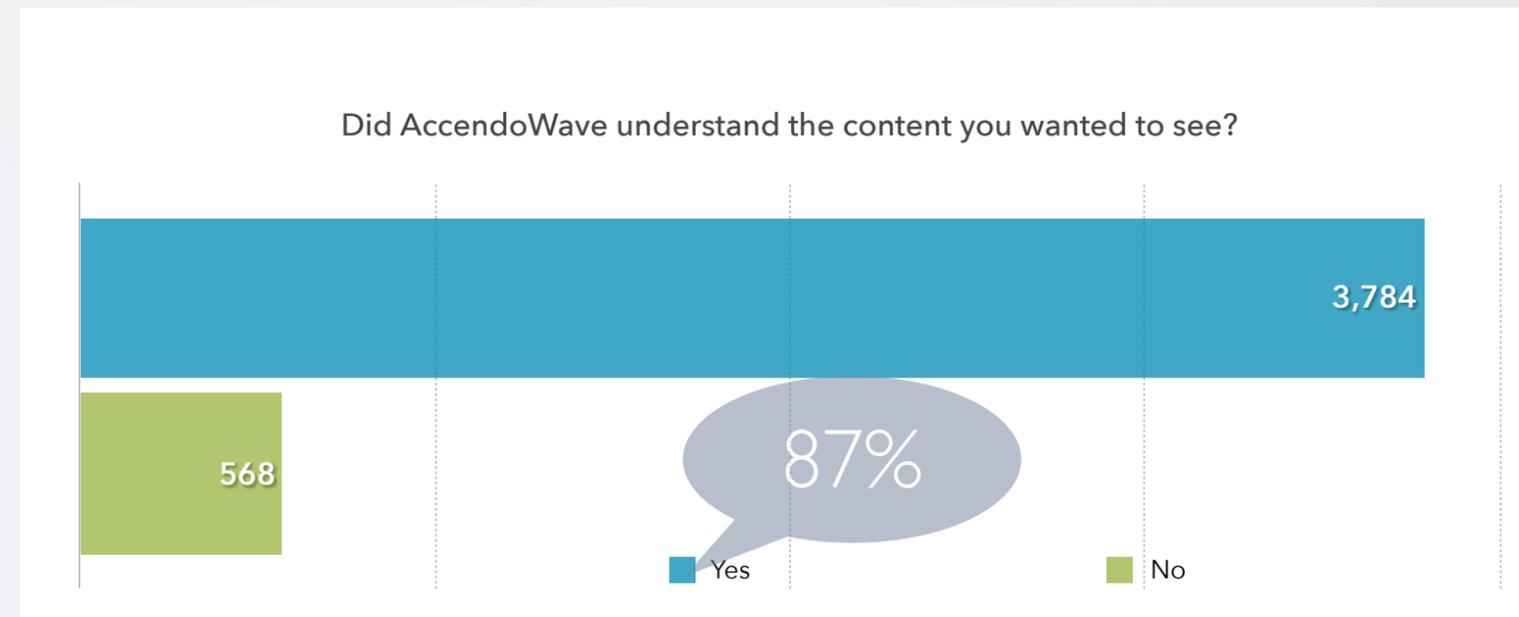

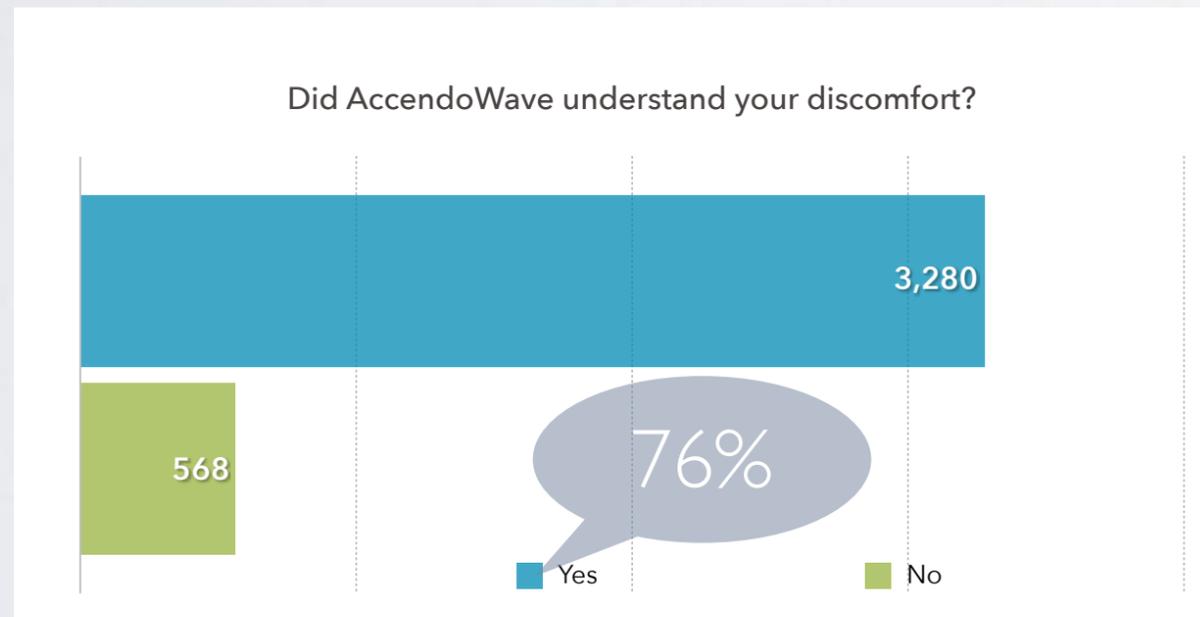

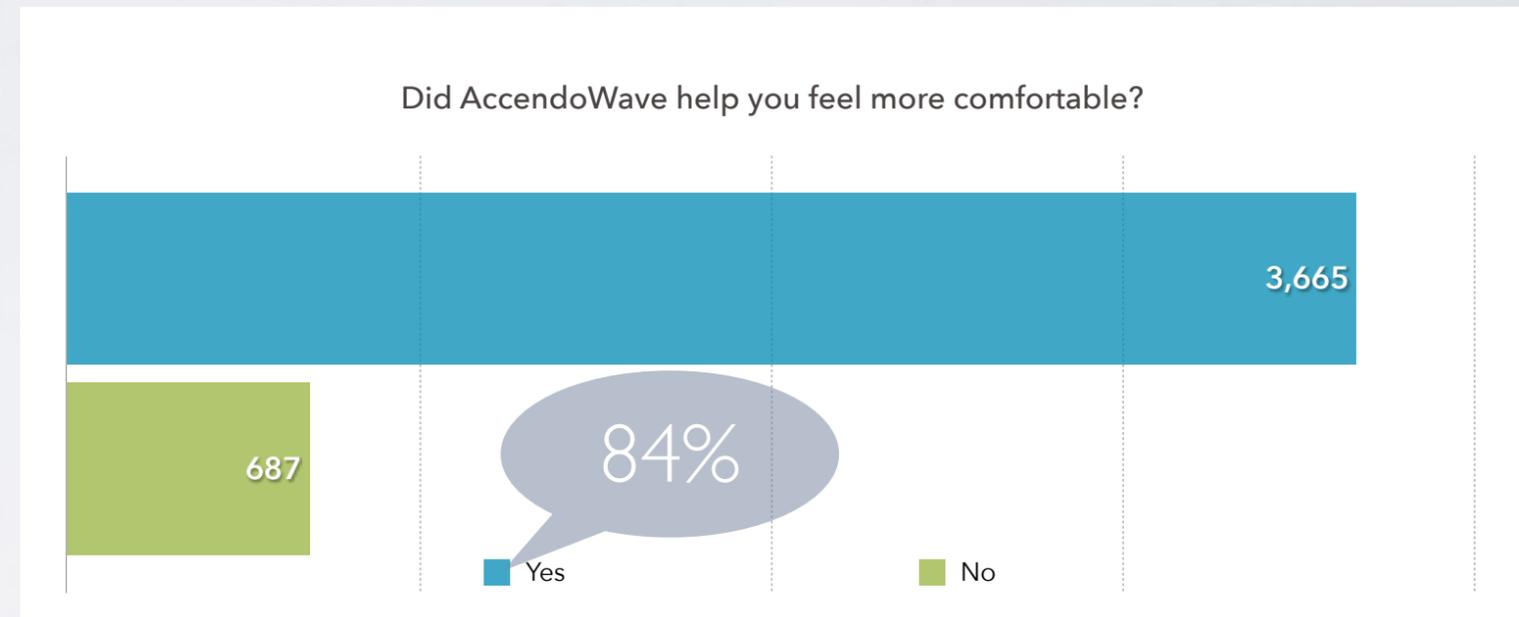

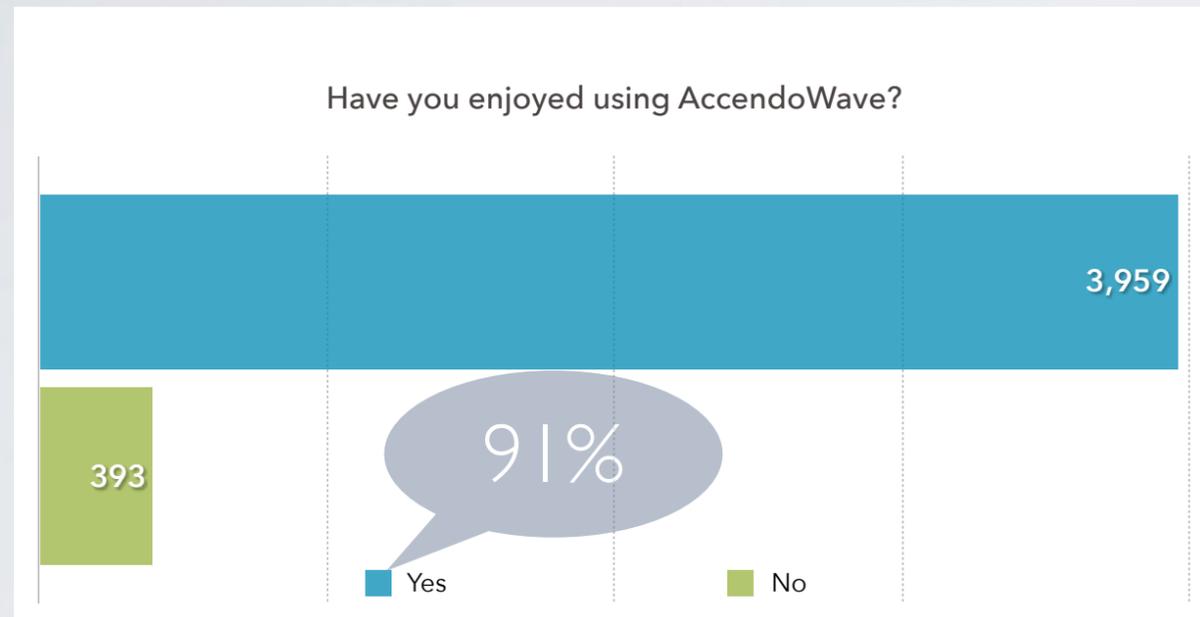

I love this thing. i'm currently using it in Southern Hills hospital myself, and it really does gauge how you're feeling to change hour experience. Wish it would deliver pain meds too, but definitely cool.

HOW ACCENDOWAVE WORKS

AccendoWave utilizes deep learning, full spectrum EEG analysis to monitor discomfort and actively distract patients. The EEG headband sends data to the Samsung tablet for computation, and is directly connected to the AT&T cloud.

Diversionsary content is layered onto AccendoWave's "brain" controlled patient facing discomfort platform. Discomfort is measured as content reduces anxiety and stress levels.

WHAT IS ACCENDOWAVE?

Samsung Tablet - Tab E

Bluetooth connected to tablet
Algorithm is on the tablet

EEG Headband

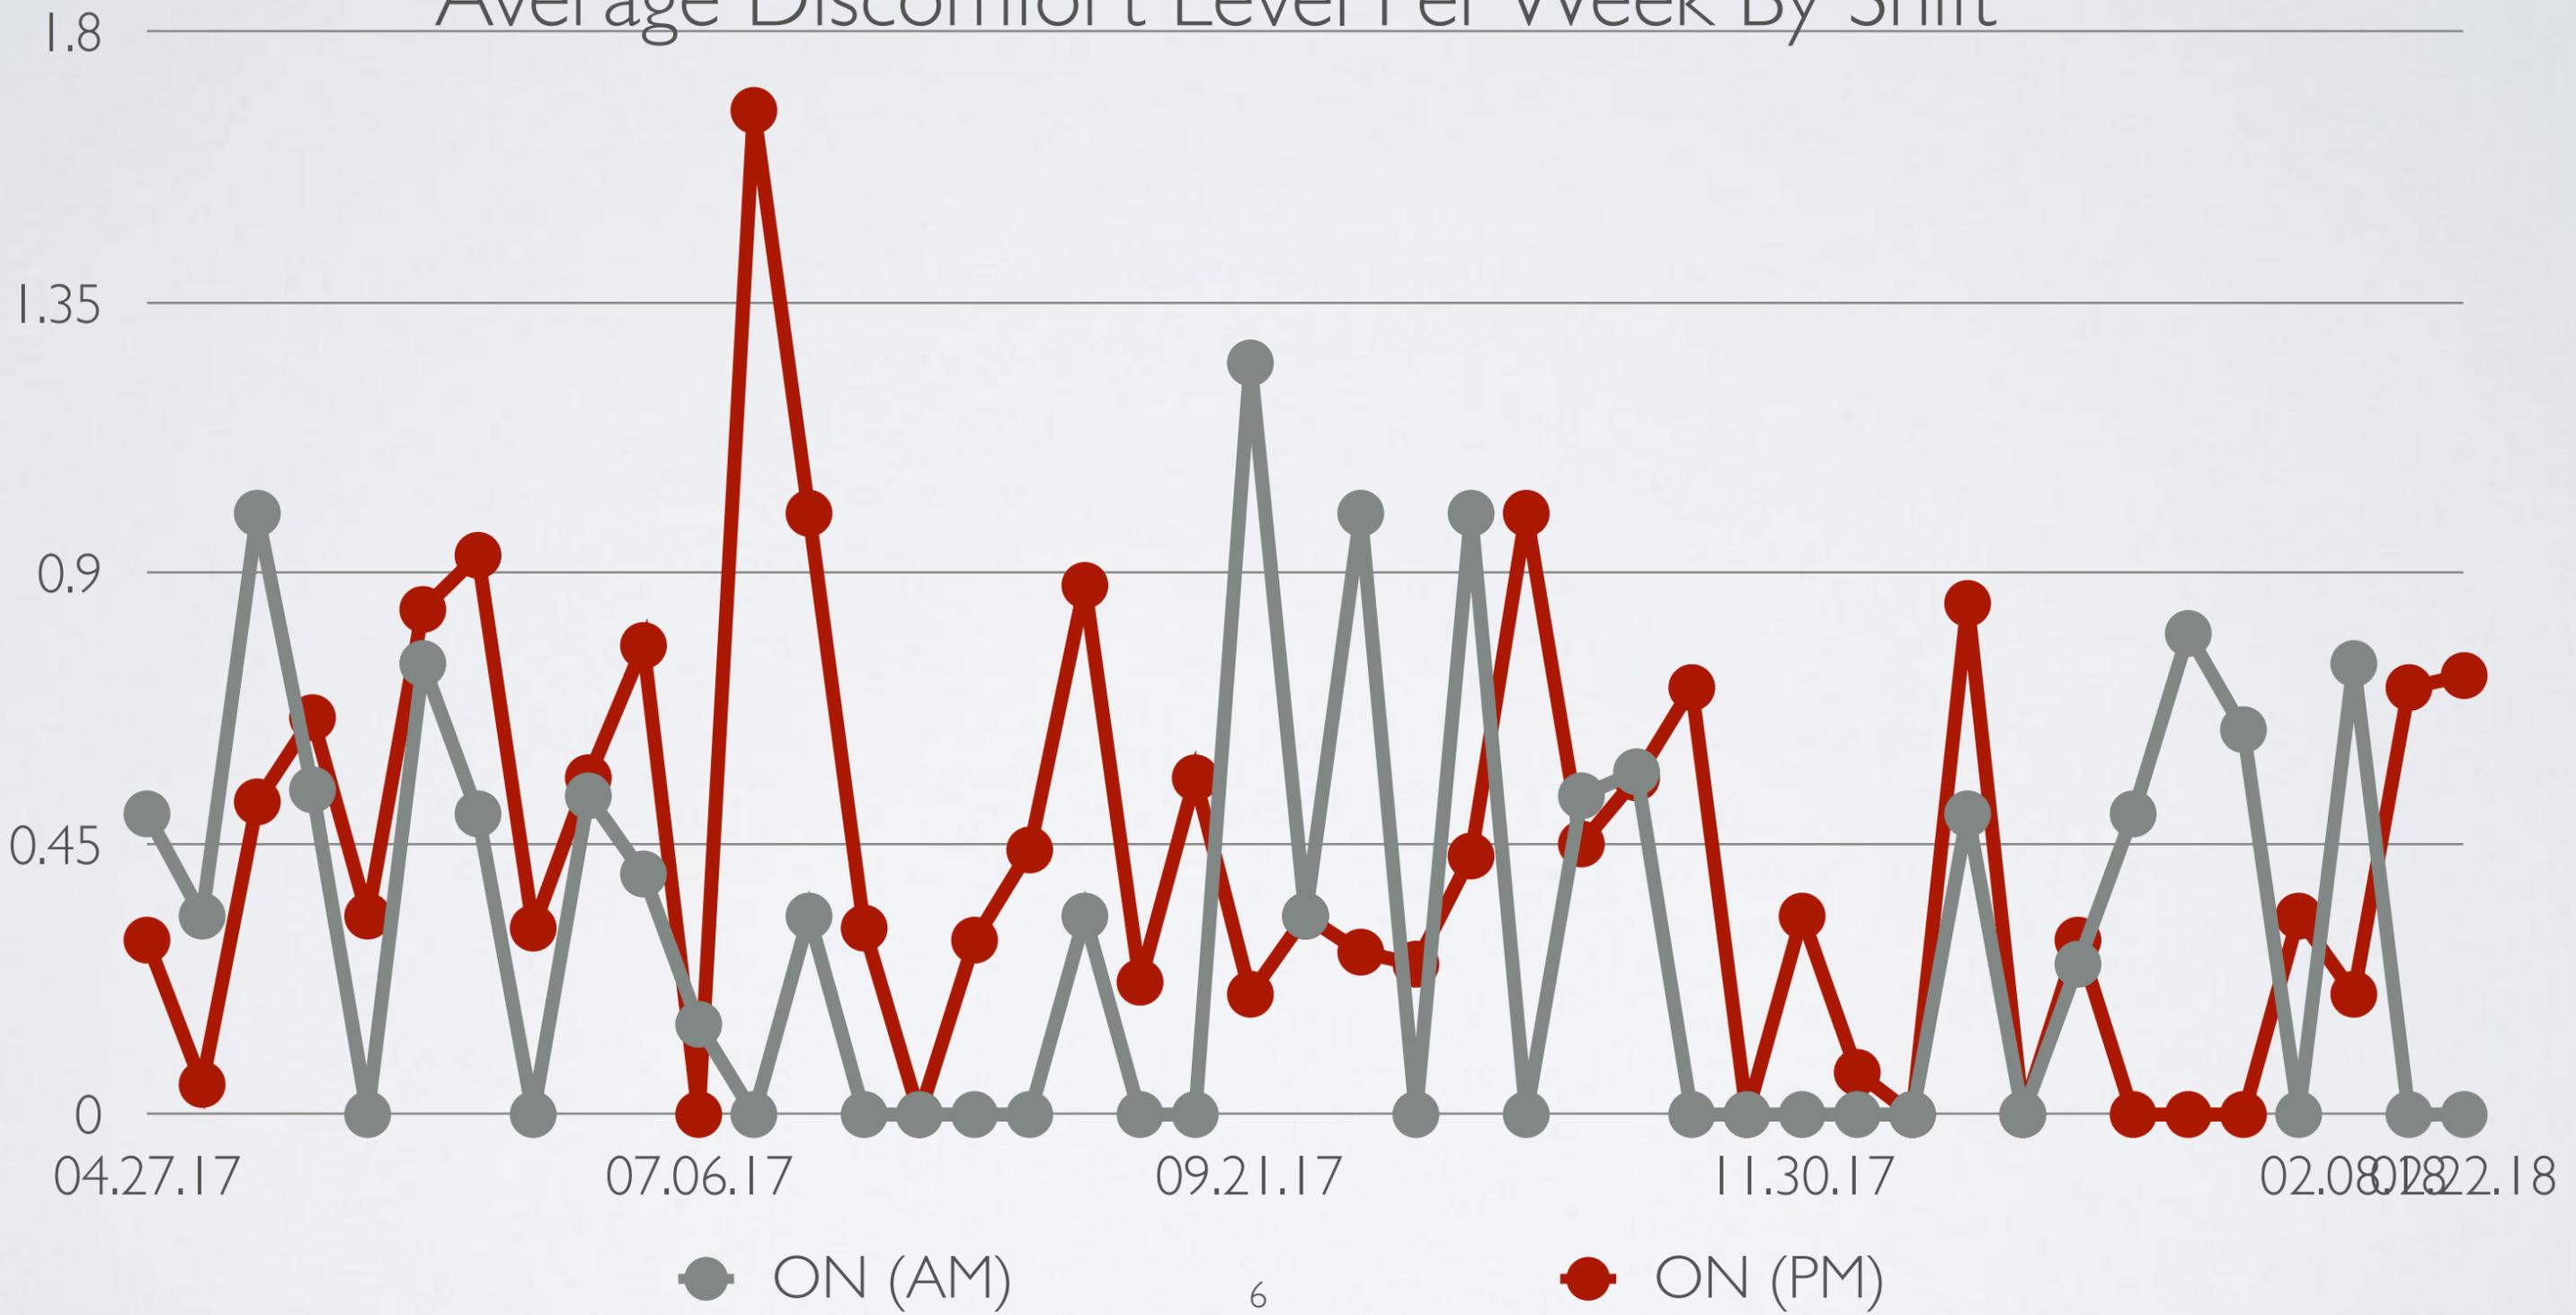

Wear like pair of glasses over middle of forehead
Press firmly on the forehead for a tight fit

Active Discomfort Management

Separately charge headbands and tablets
300 hours of pre loaded content and 400 full length movies
See your Brain Waves & Discomfort Light Up

Average Discomfort Level Per Week By Shift

Discomfort Level 0 - 5

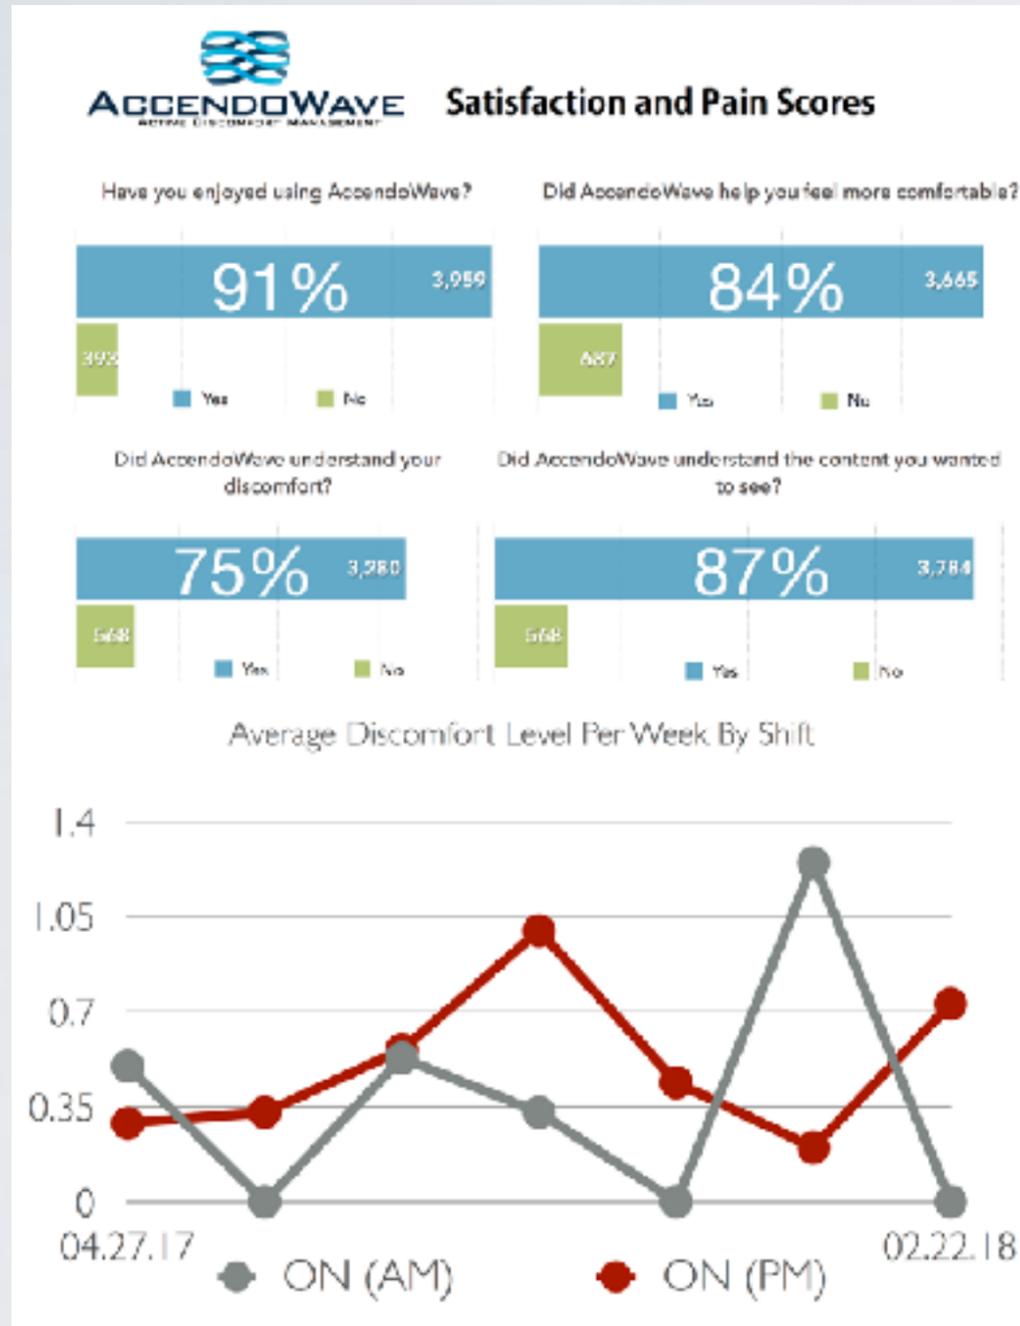

NEW JOINT COMMISSION STANDARD

“The Joint Commission announces the implementation of new and revised pain assessment and management standards, effective **January 1, 2018**, for its accredited hospitals. These new and revised requirements were developed through a rigorous research, evaluation, and review process.”

Standard LD.04.03.13

2. The hospital provides **nonpharmacologic** pain treatment modalities.

AccendoWave provides a turn-key compliance offering with data metrics for The Joint Commission nonpharmacologic pain treatment Standard!
