

## **Anthony Pirozzi**

As Director of Satellite Systems Operations (SSO), **Anthony Pirozzi** leads operations across the El Segundo Site (ranging from Unit Production to Satellite Operations and Production Operations Support). SSO is focused on operational efficiency, process standardization of unit deliveries, resource management of shared assets, centralizing production control, asset management, receiving and store room operations, and invigorating employee involvement. Additionally, Anthony is the El Segundo site union focal and main interface to Boeing Test & Evaluation (BT&E).

Anthony joined the Boeing Company in 1990 as an RF Systems Test Engineer, supporting test procedure development and STE refurbishment for the GMS-5 weather satellite program. He performed the role of Test Director, Spacecraft Leader and Validation Engineer before entering management in 1997. He led the Systems Test and STE organizations prior to becoming the Deputy Program Manager on the Readiness Program in 2005, in 2008 became the Systems Integration, Test and Launch Chief Engineer, and then in 2013 was appointed Director of Systems Integration, Test & Launch.

Anthony earned his Bachelor's Degree in Electronics Engineering Technology from California State Polytechnic University, Pomona in 1989, and a Master's Degree in Engineering from Loyola Marymount University in 2000. Anthony also volunteers in his community of San Pedro and has recently been appointed to the Port of Los Angeles Harbor Commission by Los Angeles Mayor Eric Garcetti. He has been married for 22 years to his wife Carolyn, and together they have three children, Antonio III, Vincent and Luca.
